

NTSB

TEST PREP

1

You must notify the NTSB immediately if the following occurs:

Flight through a Prohibited Area without an ATC clearance

In-flight roll upset greater than 90° of bank

The inability of any required flight crewmember to perform normal flight duties as a result of injury or illness.

2

If an aircraft is involved in an accident which results in substantial damage to the aircraft, the nearest NTSB field office should be notified immediately.

within 7 days.

within 48 hours.

3

While taxiing at the parking ramp, the nose gear, wheel, and tire are damaged by striking ground equipment. What action would be required to comply with 49 CFR Part 830?

Notify the FAA within 7 days of the incident.

No notification or report is required.

Notify the NTSB within 10 days of the incident.

4

The operator of an aircraft that has been involved in an accident is required to file an NTSB accident report within how many days?

5.

10.

7.

5

Which incident requires an immediate notification be made to the nearest NTSB field office?

An overdue aircraft that is believed to be involved in an accident.

An in-flight radio communications failure.

An in-flight generator or alternator failure.

6

Which incident would necessitate an immediate notification to the nearest NTSB field office?

An in-flight fire.

An in-flight loss of VOR receiver capability.

An in-flight generator/alternator failure.

7

You must notify the NTSB if there has been substantial damage:

To an engine caused by engine failure in flight.

Which requires repairs to landing gear.

Which adversely affects structural strength or flight characteristics.

8

NTSB Part 830 states that an aircraft operator must immediately notify them:
Of any aircraft incident.

In the case of an aircraft accident.

If the aircraft is later to its destination than one hour of its projected arrival time.

9

What period of time must a person be hospitalized before an injury may be defined by the NTSB as a 'serious injury'?

72 hours; commencing within 10 days after date of the injury.

10 days, with no other extenuating circumstances.

48 hours; commencing within 7 days after date of the injury.

10

Which of the following must be reported to the NTSB, for aircraft equipped with an Airborne Collision Avoidance System (ACAS)?

Complying with an ACAS alert on a VFR repositioning flight.

Complying with an ACAS resolution advisory (RA) while on an IFR flight plan to avert a substantial risk of collision.

Receiving an ACAS alert about a nearby traffic target without a resolution advisory (RA).

11

On landing, your tire blows and the wheel is dented. What action is required to comply with NTSB Part 830?

An immediate notification must be filed by the operator of the aircraft with the nearest NTSB field office.

No notification or report is required.

A report must be filed with the nearest FAA field office within 7 days.

12

You must notify the NTSB immediately if the following occurs.

Ground fire resulting in fire equipment dispatch.

Fire of the primary aircraft while in a hangar which results in damage to other property of more than \$25,000.

In-flight fire.

13

Which publication covers the procedures required for aircraft accident and incident reporting responsibilities for pilots?

NTSB Part 830.

FAR Part 61.

FAR Part 91.
